

Convert Numbers to Currency Format Expressed in Words  
Copyright © 1992 Robert F. Cohen

The included NUMWORDS.WPM macro converts numbers to American currency in English words.

First, type a number without the dollar sign, then press (Alt-F10), type "numwords" and press (Enter). You must include all comma separators, and you may include cents. For example, "123,698.32" becomes "One Hundred Twenty-Three Thousand Six Hundred Ninety-Eight Dollars and Thirty-Two Cents (\$123,698.32)."

Alternatively, you may type a number, continue typing and later come back to the number. Then, position the cursor at the end of the number and invoke the macro.

This macro is very useful in legal transaction forms where currency expressed as words is required. To include an expression in a merge document, put the following command in your primary document where you want the expression to appear:

```
{INPUT}type figure here~{NEST MACRO}sum~
```

The usual legal disclaimers apply.
