Lots and Lots of Bullets
By Dan Meek

The included macro, BULLET.WPM, graphically shows an assortment of up to 104 bullets from which to choose. You must modify the macro at line 5 to show the path to the included BULTAB file. (To do this, use the Macro Editor -- press (Ctrl-F10), type "bullet", press (Enter) and press 2, then press F7 when finished.) You can change the selection of bullets by editing the BULTAB file in WordPerfect.

BULLET.WPM and BULTAB are free but not for resale. Copyright Dan Meek.
