Quickly Access the Macro Commands Index
By Onik Arian

The included simple macro, ALTM.WPM, provides quick access to WordPerfect 6.x's Macro Commands Index. Just press (Alt-M), and the macro will take you to the index for A-L, and leave you in the Search on Name mode. If you press M again, the macro will immediately take you to the index for M-X.

Thanks to John Liebson for providing help in modifying this macro. Enjoy!
