Create a Footer with Page X of Y Formatting
WordPerfect Magazine
Tips

The included PAGEXY.WPM macro creates a footer with the page numbering format "Page x of y," where "x" is the current page and "y" is the total number of pages in your document.

To use this macro, press(Alt-F10), type "pagexy" and press (Enter). The macro uses the Mark Text feature to calculate the total number of pages in your document. When the macro is finished, it will have created a footer with page numbering.

Important note: If you add pages to your document after running the macro, be sure to run it again in order to update the footer.
