

Fat TrackerTM

Computer Requirements:

This version of the Fat Tracker program will work only on an IBM compatible computer. Because of the extensive “number crunching” involved, faster processors are recommended but any computer should work as long as you have:

- an Intel compatible 486/33 PC or higher
- Windows 95 or later
- at least 16 MB of RAM
- 24 MB of free hard disk space

Optimum monitor resolution is 800 x 600 (windows will be “full screen size” at this resolution). Printer fonts are TrueType Arial and Times New Roman.

Starting the Program:

Double-click on Fat Tracker icon. You will need to read and accept the software license agreement. Then program opens to the Main Menu.

Click on Help button and then “Getting Started” help section. This section will give you an overview of the program and a discussion of basic operations.

Program is driven by command “buttons” on various screens (all keyboard functions are disabled).

Notes: First time you use some functions you may notice a slight delay as program “indexes” records (this was done so posted version was smaller and downloaded faster).

The Fat Tracker application must remain in same folder as other program files. You may want to create a Windows “shortcut” file to make locating/launching easier.

Registering Software and Contacting Us:

Fat Tracker is shareware (\$25 US) and offered for a 30-day trial period. If you decide to keep/use the program, there are two ways to submit registration fee:

1) Online Processing...

Electronic (credit card) submissions can be placed anytime through Kagi at:

<http://order.kagi.com/?XU1&S>

(Secure Link)

<http://order.kagi.com/?XU1>

(Non-Secure Link)

2) Payment by Check...

Submit check (include your email address for a faster response) to:

Ranny or Gerri Saylor
141 Midland Drive
Graniteville, SC 29829

*** IMPORTANT NOTICES ***

Although Fat Tracker is written in FileMaker’s runtime engine, do not contact FileMaker, Inc. for technical support. All questions, problems or suggestions need to be sent to ranny@aol.com or through our home page at <http://hometown.aol.com/ranny/FatTracker/index.htm>.

In addition to DLL files created by Filemaker's runtime engine, there are two files, "ShFolder.dll" and "Comctl32.dll", required to run the applications. These DLLs are installed by Windows NT with Service Pack 3 and by Internet Explorer 4.0 or later. If Fat Tracker program will not open, latest version of Internet Explorer can be downloaded at Microsoft web site www.microsoft.com.
