

Your Tandy High Speed Game Card is one of the finest game cards available today. Our game card represents the latest in joystick input technology. Its ability to accommodate a wide range of computer clock speeds makes it an excellent value. This game card lets you connect two joysticks to your computer using the supplied Y-adaptor to enhance many education and entertainment software packages.

Compatibility:

The Tandy High Speed Game Card is designed for use with Tandy, IBM PC, XT, AT, PS/2 models 25, 30, and 30-286; Compaq 386, and 100% compatible computers.

Note: This card is designed for computers without built in joystick ports.
Do not use this product in any Tandy 1000 series computer.
