Note: Faxback Doc.# 4048 contains a listing of all menu options.

The LP-400 has an LCD display, 4 LED indicators, and 8 keypad controls which
are used to configure the printer.

Below is a description of each function possible with the menu operation
panel:

LCD Display: Displays status of printer, menu options, and error
                      messages.

Power/Drum Life LED: Used to indicate that the printer is powered ON and to
                      show approximate drum life. The indicator will change
                      its color from green to orange at 7,500 copies, and
                      then to red at 9,900 copies indicating that the drum
                      life is close to its end. At 10,000 copies CHANGE DRUM
                      displays on the LCD panel.

Error LED: Used in conjunction with the LCD display to indicate a
                      problem with the printer.

Ready LED: Used to indicate that the printer is ready to print. If
                      blinking, there is data in the printer buffer.

Manual LED: Used to indicate that the printer is set for MANUAL
                      paper feed.

Function: Used to enter the setup menus for the printer. Pressing
                      Function and Set at power on, will place the printer
                      in the HEXDUMP mode.

UP & Down: These buttons are used to select between the menu and
                      item selections in the setup menus. When both buttons
                      are pressed in the off line state, the printer will
                      perform a selftest.

Set: Used to "set" or select the menu/item in the setup
                      menus.

Continue/Reset: Used to save menu setup changes to memory. Or if used
                      in the menu setup mode, will reset the configuration
                      to the factory default values.

FF: This button will empty the contents of the printer
                      buffer and form feed (eject) the page.

Printfont/Test: Used when performing a Font Test or Status Print Test.

Online: Used to place the printer in the on line or off line
                      state. The Ready LED will indicate if the printer is
                      on line or off line. When the button is pressed during
                      power on, the print density function is enabled.

Using the Menu:

```
└─────────────────┘
```

Menu settings are stored in the printer's memory even after you turn off
power and they remain unchanged until you reprogram them. Use the keys on
the operation panel to program the functions. The setting you can change
flashes on the display.

1. With the printer off line, press FUNCTION to enter the menu programming
   mode.
2. Press UP ARROW or DOWN ARROW so the directory name you wish to change
   flashes on the display.
3. Press SET to enter the menu select mode. The first menu item flashes.
4. Press UP or DOWN ARROW so the menu item you want to change flashes on
   the display.
5. Press SET to enter the change setting mode. The current setting flashes.
6. Press UP or DOWN ARROW until the setting you want flashes on the display.
7. Press SET to return to the menu select mode. The menu item flashes.

   If necessary, repeat Steps 4 to 7 to program other settings.

8. Press FUNCTION to exit the menu programming mode.
9. Press CONTINUE/RESET to store the new settings into memory.

Note: The PAPER SET, MANUAL FEED, and THICK PAPER functions become valid
without pressing CONTINUE/RESET. If you changed only these functions, you
do not need to press CONTINUE/RESET.

Restoring Default Settings:

Follow these steps to restore the printer's functions to their factory
default values.

1. Press FUNCTION to enter the select directory mode.

2. Press and hold CONTINUE/RESET until the display shows MENU RESET.
